

STANDARD PROFIL

SUSTAINABILITY VISION & POLICY

As one of the leading manufacturers of sealing profiles in the Global Automotive Sector, we believe that sustainable growth will be achieved along with sustainable environmental principles and for future generations taking the environment into account in all of our actions aiming to reach 100% CO2 neutral production together with our Strategic Suppliers.

For this, we commit;

- to comply with our Corporate Policies (Health & Safety, Environment, Ethics, Human Resources, Information Security, Energy Management), all relevant legal sustainability regulations, sustainability requirements of our stakeholders and international sustainability standards in our processes,
- to conduct our energy efficiency and environmental management systems to protect sustainable natural resources (air & water quality with less consumption) and to decrease energy consumption taking into account the life cycle,
- to use green electric/renewable energy to decrease CO2 / Greenhouse Gas Emissions in our activities to combat climate change and deforestation aiming to increase biodiversity,
- to reduce the amount of waste to be generated and to prefer recycling as much as possible in waste disposal method,
- to share our Corporate Sustainability Vision & Policy with our employees, suppliers and stakeholders to increase their Sustainability awareness and sensitivity,
- to integrate Sustainability issues into our trainings to ensure high level awareness among our employees,
- to review and evaluate our Sustainability goals and objectives periodically, to provide sufficient information, expertise and economic resources to achieve them,
- to audit and report our Sustainability performance to provide continuous improvement in our Sustainability Culture,
- to provide the consultation and participation of our stakeholders to our related Sustainability processes.
