

# ENERGY MANAGEMENT SYSTEM POLICY (ISO-50001)

As Standard Profil Group, operating in the field of profile sealing in the automotive industry, we manage our energy systems in line with our goal of continuous development and sustainable growth.

**For this commit;**

To provide the necessary information and other resources to achieve our goals and energy targets,

To take energy efficiency into account in investment and design activities,

To choose energy efficient products and services while buying products and services that affect energy performance,

To comply with legal and other requirements regarding energy use, consumption and efficiency,

To encourage our employees' participation and leadership in the energy management system,

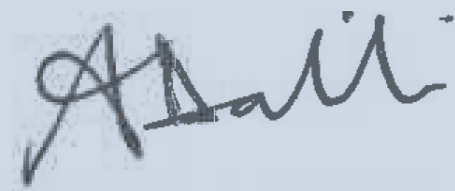

To ensure the effective use of energy resources and to increase our employees' awareness of the energy management system,

To periodically review our energy performance, continuously improving energy performance and the energy management system.
